Join us for our Complex Abdominal Wall Reconstruction Workshop with Mr Scott. This workshop will take you on a journey through live surgeries and guide you in managing complications both intra and post-operatively. You will explore various solutions for Advanced Reconstruction & Repair procedures, aiding you in selecting the appropriate Procedure with the Right Product to achieve the positive Outcomes our patients deserve!

Mr Michael Scott is a Consultant General Surgeon with nearly 30 years of experience in the field of general surgery, specialising particularly in the treatment of hernias, including 'sportsmen hernias'. He played a key role in establishing the Abdominal Wall Reconstruction service, which is the country's largest and busiest unit dedicated to repairing complex abdominal wall defects. This service ranks as one of the busiest general surgery units in Europe. Mr Scott's reputation in the field is well-known, and he has been a featured lecturer at both national and international conferences.
